

ENERGY LAW

Energy is becoming a growing sector in the Canadian landscape. Our Energy Law Group provides a broad range of litigation and dispute resolution services to clients operating in the energy and electricity industries. We have assisted our clients in the complete spectrum of power generation technologies from nuclear, hydro, coal, natural gas to renewable sources of energy and provided them with representation in litigation arising from the transmission and distribution of electricity. We have recently acted on various complex matters involving the construction, operation and ownership of energy infrastructure projects.

Our Energy Law Group has the industry specific knowledge and experience required to assist clients with the development of practical dispute resolution and risk management strategies.

Services

Our Energy Law Group offers a comprehensive range of services and experienced lawyers with expertise in energy law from production and marketing through to regulatory processes. We have acted on behalf of government entities, producers, royalty owners and oil and gas companies throughout Canada.
