

MITCHELL MOSHENBERG

This CV is current as of April 8, 2026

As the founding director of **MJM Consulting & Project Management Ltd.** I am pleased to provide you with the following information regarding my expert services.

As one of the few experts in the province providing such services, I have become involved in hundreds of people's lives. My involvement has come in the form of home modifications & building consultant regarding construction/renovation damages, barrier free renovations/retrofits and new construction.

Additionally, having acted as General Contractor and Project Manager for over 30 years I have developed expertise in the assessment and quantification of damages on construction/renovation projects and sites.

As a director of the firm my responsibilities include ensuring that every accessibility assessment and/or project, which we become involved in, is supportive of the functional requirements of the occupant (claimant) and their respective families, caregivers etc. All recommended modifications and equipment must be considered reasonable and medically necessary.

In order to ensure that this is possible, **MJM Consulting** will refer to or enlist the expertise of any professional whom we feel will provide a component, which the principals and consultants at **MJM Consulting** are not expert in or licensed to provide.

An example of this is where the functional abilities and requirements of an individual are not clearly understood. **MJM Consulting** will refer the client to an Occupational Therapist or Physiatrist. **MJM Consulting** will then obtain a copy of the assessment(s) done by others and review that report in order to be able to make reasonable recommendations for the modification or construction of the claimant's home.

In most cases **MJM Consulting** will then prepare a set of proposed home modification plans for review with the others in a multi-disciplinary fashion.

I have been retained by legal counsel, insurance companies and others, to work on and provide expert opinion regarding construction/renovation damages cases, motor vehicle accident claims, medical malpractice cases, slip & falls and CRA Cases where the claimant has become mobility or otherwise impaired.

In this domain I have provided my expert opinion by way of my assessment/reporting and construction services to hundreds of individuals and companies. I have been involved in Mediation, Arbitration and in Trials in Ontario. My opinion has always been accepted as unbiased and articulate.

Our services are available to all those who require the benefits of a full-service

MITCHELL MOSHENBERG

assessment / construction company whose focus is barrier free retrofit, renovations and new construction.

If you have any further questions or comments, please contact the undersigned at your convenience at mitchell@mitchellmoshenberg.com
