

CONSTRUCTION LAW

Whether in times of boom or bust, the real estate and construction market are rife with unique pitfalls for those individuals and companies involved in the fields.

The complex contractual relations amongst the various parties who contribute to the construction process, and the legal regime that oversees and regulates those relationships, require the assistance of a capable law firm.

Services

Our law firm's Construction Law Group is an experienced team of lawyers who provide a full range of advice in all areas of construction litigation. We routinely act for all significant stakeholders in the construction industry, including:

- Owners
- Developers
- Architects
- Engineers
- Contractors
- Sub-contractors
- Sureties
- Financial Institutions
- Lenders

Our Construction Law Group is able to respond to the urgent needs of our clients and work with them to craft practical and timely solutions to minimize conflicts and, if possible, to avoid disputes entirely.

Construction disputes are often suited to alternative dispute resolution (ADR), and our Construction Law Group's background in arbitration, mediation, and other ADR methods helps us to resolve matters favourably, and at an early stage. Please contact any members of the group for further information or assistance.
